Read/Write eeprom from DAS (Drive Authorization System) Read/Write eeprom from AAM (All Activity Module)

Read/Write eeprom of ESL () - both old and new versions of the ESL

- requires a direct connection to the ESL and cannot be done via the diagnostic plug

- for new ESLs (W203, W211 and so on) it is necessary to have the database file

Edilock Ltd.

MN008	Key Learning SMART All models SMART - Smart City, Smart Crossblade, Smart Roadster, Smart Fortwo, Smart Forfour - from year 1998 up to now! Programming keys by OBDII	360
MN009	Odometer Correction in Instrument Cluster in SMART after 2007 year Odometer Correction in Instrument Cluster in SMART vehicles via OBDII after 2007 (451, 454, 456)	200
MN011	Odometer Correction For clusters, which use K-Line and CAN * Mileage recalibration in Instrument Cluster for Mercedes VITO-MM W638, E-Class W211, CLS W219, GL X164, ML W164, R-Class W251, C-Class W203 and G-Class W46 * Read/Program of the EEPROM from Instrument Cluster for Mercedes VITO W638, E-Class W211, CLS W219, GL X164, ML W164, R-Class W251, C-Class W203 and G-Class W46 * Ability to suppress mileage synchronization between EZS and Instrument Cluster for Mercedes E-Class W211, CLS W219, GL X164, ML W164, R-Class W251 * By OBDII - Comprehensive odometer correction for W221 and W216 vehicles. The odometer is changed in the following units: CGW, EZS, Instrument Cluster and all other units which store the odometer (like Tire Pressure Monitor and Adaptive Brake, for example) * Read/Write service history records in ZGW of W221 S-Class and W216 CL * Read/Write complete EEPROM and Flash of CGW (Central gateway) of W221 S-Class and W216 CL * Odometer correction in dashboard for Vito, Viano, Sprinter after 2006 * Synchronization between Instrument Cluster and EZS for Vito, Viano, Sprinter after 2006 * W210 E-Class (1996-2001) – odometer correction and EEPROM read/write * W202 C-Class (1995 – 1999) – odometer correction and EEPROM read/write * W203 C-Class (requires a direct connection to the cluster's plug, cannot be done through the OBDII!) – odometer correction and EEPROM read/write * W168 A-Class (1998-2004) – odometer correction and EEPROM read * W208 CLK (1995-2002) – odometer correction and EEPROM read/write * W461 G-Class – odometer correction and EEPROM read/write * W463 G-Class (requires a direct connection to the cluster's plug, cannot be done through the OBDII!) – odometer correction and EEPROM read/write * W163 M-Class – odometer correction and EEPROM read/write * R170 SLK – odometer correction and EEPROM read/write * W140 S-Class – odometer correction and EEPROM read/write * W220 S-Class – odometer correction and EEPROM read/write * ASSYST Service maintenance records history by OBDII in Instrument Cluster: W203, W210, W163, W164, W202, W208 * W211 - ASSYST PLUS by OBDII. Works for W211 vehicles after year 2006 * W211 – ASSYST by OBDII. Works for W211 vehicles.	1656

Edilock Ltd.

* CGW by dump – view/change service history records.

- Works for all models equipped with a CGW device: W211, W164, W169, W245, W171, W219, SMAR

* Odometer in EZS by dump tool

* Odometer in EDC16 by dump tool

Read/Write COMPLETELY eeprom from Central Gateway module
(W211, W171, W219, W164, X164, W169, W245) via OBDI
